Description

The Foscarini Caboche Plus Terra Grande floor lamp has a lamp shade of numerous spheres. The spheres are made of transparent polymethyl methacrylate and are available in the colours transparent or grey. The spheres multiply the light of the central light source through their ring-shaped arrangement, whereby the light is emitted glare-free in all directions. The zigzag shape of the mounting brackets diffuses the light to the maximum without shielding it. The mounting brackets are no longer visible once the spheres are attached.

The lamp base of the Caboche Plus Terra Grande is a round base with three arches made of white lacquered metal. The lamp shade of the floor lamp has a diameter of 70 cm and a height of 28 cm. A dimmer is integrated on the supply line. The Caboche Plus floor lamp is operated with an LED that has a colour temperature of 2,700 Kelvin extra warm white. In addition to this floor lamp, the smaller Caboche Plus Terra Media with a height of 154 cm is also available.
