

Anglepoise

Original 1227 Lamp with Wall Bracket

Oberfläche

- chrome
- black
- grey
- white

Technical details

Country of Manufacture	 United Kingdom
Manufacturer	Anglepoise
Designer	George Carwardine
Year of design	2012
protection	IP20
Scope of delivery	LED 230 Volt
voltage suitability	110 - 240 Volt
Projection in cm	88
material	aluminum, cast Iron, Textile
cable length	200 cm
dimming	dimmable on site
socket/light fixture	E27
switchability	on the lead
Power (max. Watt)	20 Watt
LED	inclusive
Shade diameter	14 cm
Shade height	16 cm
bulb exchange	on site itself
light distribution	directly
Dimensions	H 55 cm

Description

The Anglepoise Original 1227 Lamp with Wall Bracket is a wall lamp with a movable articulated arm. Thanks to proven tension spring technology, the articulated arm can be readjusted again and again. Cause of this, it also retains any set position. The wall mounted lamp is given additional flexibility by the rotatable and tiltable lamp shade. Both the lamp shade and the articulated arm are made of aluminum. The wall bracket is made of cast iron. Industrial designer George Carwardine developed the tension spring technology used in this lamp back in the 1930s. Since then it has been used in numerous Anglepoise lights. The surfaces bright chrome, linen white, dove grey and jet black are available. The lamp can be connected via a cable with plug. An on/off switch is integrated on the 200 cm long textile braided cable. The wall light can be operated with LED retrofit lamps or compact fluorescent lamps. A table base in the matching surface is included in the scope of delivery.
