### Description

The Marset Dipping Light is a table lamp with a shade made of mouth-blown glass. The shade has several layers of colour that merge barely noticeably in concentric circles. The cylindrical lamp base is made of brushed brass. When switched on, the emitted light is differently coloured by the different layers of colour of the lamp shade. Even when the lamp shade is switched off, the different layers of colour are clearly visible. The table lamp is available in pearl white, blue, green, amber and pink. An LED is integrated as a light source. The Dipping Light has a height of 22.2 cm and a shade diameter of 12.5 cm. It is regulated by an on/off switch on the supply line.
