### Description

The Serien Lighting Curling Wall Acryl klar M creates a light effect on the wall around the lamp. It has a diameter of 22 cm and a depth of 11 cm. This wall lamp by Serien Lighting is offered with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. The lamp with dim to warm function imitates the dimming behaviour of classic incandescent lamps, which is perceived as pleasant. When dimmed down, the light not only becomes darker but also changes its colour temperature. Thus, when dimmed, the colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white. The Curling Wall with a clear shade made of acrylic glass is also available with a diameter of 16 cm.
