## Description

The Catellani & Smith Lucenera 500 Tavolo is a flexible table lamp because it has two tilting joints. One tilting joint is located on the base of the lamp, the other joint on the reflector. This allows the rod and head of the lamp to be tilted as desired. By moving the reflector, the beam angle of the light can be adjusted at any time. With a larger beam angle, the light is distributed over a larger area.

The Lucenera 500 Tavolo is available in two surfaces: black or white. The black reflector is made of carbon fibre, the white reflector of technofibre. The GU10 LED is replaceable. The LED table lamp has a dimmer on the supply line.
