### Description

The Domus Kioto 6 is 68 cm long and 36 cm wide. Its height is 8 cm. Its lamp shade is made of Lunopal, a high-quality material that Domus has developed for its lamp shades. It is reminiscent of fine Japanese paper, is particularly environmentally friendly and does not fade. The white transparent lamp shade is surrounded by a wooden frame made of beech. The Kioto 6 can also be used as a wall lamp and can be mounted as a surface-mounted or recessed lamp. It is operated by a powerful, dimmable LED and has a colour temperature of 3,000 Kelvin warm white. A beech covering frame is available as an optional accessory, which can be used to cover the metal bracket of the lamp.
