Descripción

With a total of 5,400 lumens and a color rendering index of over 90, the Holtkötter Janus K ceiling lamp offers powerful light that is emitted directly or indirectly as desired. The lamp arms attached to the sides of the rectangular canopy can be swiveled up to 180°. The lamp heads, which can be continuously rotated and swiveled in all directions and each contain a replaceable LED board, enable the light to be individually aligned. When dimming, the light color of the integrated LEDs changes to a warmer tone thanks to the dim-to-warm technology (from 2,850 Kelvin warm white to 2,200 Kelvin warm white). The maximum projection of the Janus K ceiling light is 42 cm. The ceiling canopy is 33 cm long, 6.2 cm wide and 3.6 cm high. The Janus K from the German manufacturer Holtkötter is available in the following surface structures: matt aluminum, black/anodized brass and black.
