## Descripción

The lamp arms of the Serien Lighting Job are adjustable at any time. Its lamp head can also be swivelled. This table lamp emits its light directly and shielded at the sides. It also convinces functionally: even at maximum power, the lamp head remains cool. The underside of the table base is made of genuine leather; the table clamp and the Furniture furniture adapter for direct mounting are made of polished stainless steel. The lamp arms and shade are made of borosilicate glass and stainless steel. This table lamp is regulated with a push button dimmer on the lamp head. The lamp has the Dim2Warm function, which changes the light colour of the LEDs to a warmer tone (from 2,900 Kelvin warm white to 2,200 Kelvin extra warm white) when dimmed.
