### Descripción

The Luceplan Lady Costanza Wall Dimmer can be adjusted in its height between 215 and 248 cm. In addition, it can be rotated almost 180 degrees on the wall holder and is therefore also suitable as a reading light. The curved shape of the lamp rod makes it possible to illuminate a table or a sofa well while not completing the floor.

The integrated sensor dimmer has a rod shape and is located on the light head. The dimmer must be touched only slightly to select the three brightness levels. The frame is made always of aluminum while the shade is available in white, black, shaded stone or red. Paolo Rizzatto designed the lamp series in the year 2008 following the example of the well-known Costanza series.
