

Luceplan

Blow remote control

Technical details

País de la Fabricación	 Italia
fabricante	Luceplan
diseñador	Ferdi Giardini
material	policarbonato

Descripción

The Luceplan Blow remote control for ceiling fan Blow can be used to set all functions of the fan. With the infrared remote control, the speed of the ceiling fan can be adjusted continuously. In addition, it also regulates the light intensity and can even dim the light. The rotation of the coloured and transparent wings of the Blow bring a cooling breeze and a pleasant light distribution in the room.
