### Descripción

This Blow Me Up by Ingo Maurer is connected via a canopy and used as a pendant lamp. The lamp is inflated via a hand pump and has a length of 120 cm. An adjustment ring is integrated on both cables for the suspension, with which the suspension can be individually adjusted. The lamp can be suspended in this way horizontally or diagonally. The upper side is silver, the lower side white.

The integrated LED in the lamp illuminates the reflective side, so that indirect light is emitted into the room. With a sensor switch on one side of the LED, the Ingo Maurer Blow Me Up can be switched on and off as well as dimmed by means of gesture control. The integrated LED has a power of 20 watts and a colour temperature of 3,000 Kelvin warm white. In addition to this pendant lamp, also a 180 cm long version is available. The lamp is also in both lengths offered as a floor or wall lamp, which is connected via a power plug.
