Descripción

The Vistosi Aurora PP 40 can be used as a wall or ceiling lamp. Its lamp shade is made of mouth-blown glass in white satin finish and has a crystal glass rim. When switched on, it creates a halo effect around the lamp on the ceiling or wall. This light has a diameter of 40 cm and a height of 12 cm. The Aurora PP 40 is available as an E27 lamp and as two LED lamps. One LED lamp can be dimmed with a trailing edge phase dimmer, the other LED lamp is 0-10 volt dimmable. Both LED lamps are supplied with a colour temperature of 2,700 Kelvin extra warm white as standard, on request both are also available with 3,000 Kelvin warm white. The E27 lamp is dimmable on site and can also be operated with replaceable LED retrofit lamps. The two LED lamps have a ceiling or wall bracket made of metal in matt white, the E27 lamp in glossy white.
