Descripción

The Vistosi Bissona table lamp has a continuous body made of glossy white glass. The glass used is elaborately handmade and mouth-blown. The lamp shade is opened downwards, whereby the light is emitted directly downwards. At the same time, the light also emits glare-free into the room through the partially translucent lamp shade. The Bissona has a height of 42 cm and a width of 24 cm at its widest point. A switch is integrated on the supply line. This table lamp can be operated with halogen lamps or LED retrofits. It was launched on the market in 2007 with a new design based on drafts from Vistosi's historical archive.
