### Descripción

The compositional elements of Chapeaux V, the table lamp with direct and diffuse light designed by Rodolfo Dordoni, have been reduced to a minimum. At the centre of the design are three shades - different in shape, material and finish - that rest freely on a central, cylindrical borosilicate glass body open at the ends, which also carries the light source: an opal polycarbonate ampoule that encloses the lighting components and appears to float in the glass. The brushed aluminium bracket attached to the top is a touch dimmer with three light levels that saves the last selection when controlled by a wall switch. In the V version, the shade is made of hand-blown flashed glass with a glossy surface. The light partially flows through the shade and illuminates it from the inside to create a soft atmosphere. In the warm white version, the glass colour is white when switched off and ivory when switched on thanks to an inner layer of glass in a straw yellow shade.
