

Knapstein

MEGGI

Oberfläche

- níquel
- bronce

Technical details

País de la Fabricación	 Alemania
fabricante	Knapstein
año	2024
Profundidad en cm	7
Diámetro en cm	30
material	Acryl, Metall
Atenuación	control por movimientos
Potencia en vatios	17 W
LED #	inclusive
Indice de reproduccion cromatica	>90
El flujo luminoso en lm	1904
Temperatura de color en grados Kelvin	Dim to warm
protección	IP20
Volumen de suministro	LED
entrada de tensión	230 - 240 Volt
Dimensions	Ø 30 cm

Descripción

The Knapstein MEGGI is equipped with a sensor dimmer that can be used to switch the lamp, dim it continuously and change the light colour. This sensor is located in the front part of the reflector. Simply swipe the sensor to switch the lamp on or off. The light colour of the lamp can be adjusted to a warmer tone (from a colour temperature of 3,500 Kelvin warm white to 2,200 Kelvin extra warm white). All dimming and light colour settings are saved using the memory function and automatically reset the next time the light is switched on. The tilt and turn joint on the reflector allows the light to be aligned and positioned as required. The Knapstein MEGGI emits indirect light, has a diameter of 30 cm and is 7 cm deep. The rotatable and tiltable reflector of this wall light has a diameter of 15 cm. The Knapstein MEGGI is available in several surfaces.
