Description

The Foscarini Magneto Tavolo is a table lamp with modern LED technology. It was designed by Giulio Iacchetti with a lamp body made of painted steel and ABS in 2011. The Magneto Tavolo is available by Foscarini in white or black.

Particularly interesting and flexible is the Magneto Tavolo by the magnet, which gave the light its name. This magnet can be attached at different locations of the lamp rod. By this turn the lamp head is attached and can be brought over and over again in various positions. So both the light and the appearance of the light can be adjusted again and again to any current needs.
