Description

The Serien Lighting Jones floor lamp can be used for different illuminations: As a ceiling washlight, it can primarily emit light directed upwards, as a reading lamp, it can emit direct light directed downwards or decorative light downwards and upwards as well as diffuse light into the room at the same time.

Two push button dimmers on the lamp rod control the height adjustability of the lamp. When the lamp rod is pushed all the way up, the light is predominantly emitted upwards onto the ceiling. In the middle area, the light is emitted diffusely into the room as well as directly downwards and upwards. When pushed downwards, the light of the floor lamp is mainly emitted downwards. A third push button dimmer on the rod controls the brightness continuously. With an orange glass insert, the white shade can be illuminated in colour.

The Jones floor lamp is offered in an LED or a halogen version: The Jones LED is operated with an integrated 38 Watt LED. The halogen version is equipped with an E27 bulb with a maximum of 205 watts. Two shade diameters are offered: 34 cm or 45 cm. The lamp with the smaller shade diameter is height-adjustable from 155 cm to 171 cm, the larger lamp can be adjusted in height between 152 cm and 172 cm.
