### Description

The Luceplan Hope Ceiling 69 is the smallest of two ceiling lights of this series with a diameter of 69 cm. The height of the lamp is 41.5 cm. This smaller ceiling light differs from the larger one by the diameter, but also by the smaller number of Fresnel lenses arranged in pairs on a transparent support structure. The Fresnel lenses break the light like glass and simultaneously produce numerous reflections on the wall, floor and ceiling.

The lighting series was created by the designers Paolo Rizzatto and Francisco Gomez Paz in the year 2009. The both designers were inspired by the famous Hope Diamond. The series has already won several prizes such as the Compasso d'Oro and the Red Dot Design Award.
