Description

The Vistosi Bolle FA P can be used as a wall or ceiling lamp. It has a lamp shade made of mouth-blown crystal glass with a diameter of 16 cm. When the glass is processed, air bubbles are enclosed into the glass to give it a special texture. This texture causes numerous reflections on the surface of the lamp and also creates a halo effect on the ceiling or wall. The Bolle FA P is available in crystal transparent and white surfaces. The metal parts of both versions are nickel-plated.
