Description

The Knapstein HEDI-3 is a swivelling and rotating wall lamp with two joints. Both joints are located in the lamp arm. The lamp has a maximum projection of 54.5 cm. The light is emitted from the lamp directly downwards and laterally through the lamp shade into the room. This wall lamp has a round wall bracket. The HEDI-3 is available in brass and matt nickel. The surface of the brass version is partly polished and partly matt. This version has a white lamp shade, the nickel version has a snow white shade. The lamp shade is made of Silkolite and can be supplied in other shade materials on request. It is 17 cm high and has a diameter of 26 cm.

As standard the HEDI-3 has no switch. On request it can be supplied with a switch. The E27 socket of the lamp can be used with LED retrofits.
