Description

The Avion wall lamp by the German manufacturer Gera Leuchten has a 4-stage swivel range that allows the emitted light to highlight different wall areas depending on the setting. In four selectable stages (4-stage by 69 degrees), the lamp can be adjusted to illuminate wall areas of different sizes underneath it. This LED wall light is in the surface aluminium-coloured. The Avion by Gera Leuchten is 150 cm long, 8.8 cm wide and 4 cm high. The lamp connection is located centrally, directly at the connection terminal. The lamp can be dimmed and the colour temperature adjusted from 2,700 Kelvin extra warm white to 6,000 Kelvin cool white via an integrated micro-knob switch. The scope of delivery also includes a two-metre plug-in cable.
