## Description

The Brokis Memory Ceiling 300 PC877 is a ceiling light with a mouth-blown Triplex Opal glass. This glass is one of the highest quality materials used in the lighting industry. The handcrafted production of Memory follows the centuries-old tradition and experience of master glassblowers. The precise workmanship of mouth-blown glass gives all Brokis products a distinctive, durable character and outstanding quality. The glass shades are formed from several layers of molten glass, each of which is inspected by a master glassblower before being blown into shape. Up to 70% of the quality is achieved at this stage of production.

The Memory Ceiling 300 PC877 has a diameter of 30 cm and a height of 32.5 cm. It is offered in the glass colours triplex opal, grey, light pink, red, amber, brown, orange, yellow, apple green, turquoise and blue. All glass colours are available with the surface in glossy or matt etched on both sides. The lamp can be operated via a pull switch. The pull switch is supplied in white as standard, but is also available in black on request. The Memory ceiling lamp 300 is suitable for E27 halogen lamps or LED Retrofit.

The Brokis Memory collection awakens the imagination and reminds of a carefree childhood. The ceiling lights in different sizes, the wide range of colour options and a choice of finishes add a high degree of versatility to this lighting experience. The illusion of inflated balloons is flawless, right down to the dangling cord with pull switch used to turn the light on and off. This is beauty in its simplest and most compelling form.

Each light is shipped with a high quality paper envelope containing the installation instructions, white cotton gloves to handle the light gently, a certificate of authenticity and the BROKIS Small Catalogue. After opening the box, you will find a QR code that will take you to a short video showing you how to safely unpack and commission your new lamp, as well as detailed
