Description

The Bover Nans Sphere PF/80 Outdoor is a ceiling lamp with an almost spherical lamp shade made of a hand-woven, synthetic polyethylene fibre. Its lamp shade has a diameter of 80 cm and is 76 cm high. Including the lamp rod and ceiling mounting, the lamp is 101 cm high in total. The lamp rod and ceiling mounting are together 25 cm long. On request, the ceiling lamp is also available with a total height of approx. 131 cm.

The Nans PF/80 Outdoor is offered with a lamp shade in the colours red, brown and beige. The lamp rod including the ceiling mounting is made of stainless steel and aluminum and always has a graphite-brown colour. The synthetic polyethylene fibre of the lamp shade is so resistant and weatherproof that this lamp is also suitable as an outdoor lamp. With a protection rating of IP65, the ceiling light is dustproof and protected against water jets from any angle. The light is emitted downwards and sideways through the lamp shade. A diffuser made of polycarbonate ensures glare-free light emission.

The Nans Sphere PF/80 Outdoor ceiling lamp is operated with an integrated LED that has a colour temperature of 2,700 Kelvin extra warm white. The LED can be dimmed on site with a trailing edge phase dimmer. A DALI or 1-10 volt dimmable version is also available on request. In addition, a version that can be dimmed with a Casambi module by smartphone via Bluetooth is also available on request. This optionally offered version with Casambi module can be operated easily and intuitively via mobile devices using the free CASAMBI app (iOS and Android). Casambi thus expands the control options with functions such as dimming, grouping of lamps, programming of groups and scenes, automations and much more.

Cala Nans is a small cove in Cadaques (Spain), accessible only by footpaths or by sea. An unspoilt corner of the Mediterranean, where vegetation and the

vigilance of an old lighthouse make this place a primordial spot where all you K-Meral GmbH & Co.
