Omschrijving

The Foscarini Big Bang XL LED pendant light is, like the other lamps of this series, composed of several panels, which at first sight are arranged haphazardly and which overlap each other. This results in a wide range of reflections on the wall, ceiling and floor. Also a glare-free, diffuse room light is emitted.

The light is offered in two surfaces. The holder is made of lacquered metal. The LED pendant light is on site DALI dimmable and has an integrated LED with a power of 87 watts. In addition to this version, a halogen light is available as well as various sizes. Enrico Franzolini and Vicente Garcia Jimenez designed the LED version in the year 2016.
