Omschrijving

The Anglepoise Original 1227 Mini Ceramic Pendant has a bone china lamp shade with a diameter of 13 cm and a height of 14 cm. When switched on, the lamp shade becomes translucent. Nevertheless, most of the light is emitted directly downwards. The painted canopy has a diameter of 10 cm and a height of 6 cm. The grey textile braided cable with a maximum length of 150 cm can be shortened if required. LED retrofit light sources or compact fluorescent lamps can be used for this pendant lamp. The shape of the lamp shade was adopted from the first Original 1227 lamps from the British manufacturer, which industrial designer George Carwardine had already designed in the 1930s.
