## **Omschrijving**

The Vistosi Damasco SP P pendant lamp has a diffuser made of mouth-blown crystal glass. During production, threads of molten crystal glass are manually placed around the glass diffuser, creating a particularly organic structure. The light is emitted directly downwards through the opening at the lower end of the lamp. At the same time, the transparent glass diffuser also radiates light into the room, which is partially reflected by the surface of the pendant lamp. The Damasco SP P is available in the glass diffuser colours crystal clear and amber. It is 12 cm high and has a diameter of 7 cm. This pendant lamp is available as G9 and LED version. The LED lamp has an integrated LED with a colour temperature of 2,700 Kelvin extra warm white and is dimmable with a trailing edge phase dimmer. On request, it is also available with a colour temperature of 3,000 Kelvin warm white or 0-10 Volt dimmable. The cable can be shortened if required. With the supplied ceiling hook, the pendant lamp can also be mounted independently of the power outlet.
