Omschrijving

The Serien Lighting Drum Suspension Tube S Long is a pendant lamp with a mouth-blown clear glass. Inside the glass is a conical reflector made of opal acrylic glass. The mouth-blown glass is 21 cm high and has a diameter of 16 cm. The pendant lamp can be individually suspended in its total height when installed.

The Drum Suspension Tube S Long is available from Serien Lighting with a colour temperature of 2,700 Kelvin extra warm white, 3,000 Kelvin warm white or with dim to warm function. With the Dim to warm function, the dimming behaviour of classic incandescent lamps, which is perceived as pleasant, is imitated. When dimmed down, the light not only becomes darker, but also changes its colour temperature from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white.
