Omschrijving

The SirSimon by Lichtlauf floats in space like a three-dimensional free sketch. Each lamp consists of about 80 metres of copper wire, which is formed into a volume by hand and soldered. This special manufacturing process makes each SirSimon unique. The coating combines the structure into a luminous cloud. Part of the light of this light sculpture is emitted powerfully downwards, the rest is gently distributed upwards. The SirSimon pendant luminaire is perfectly suitable for glare-free illumination of tables, but also as a light sculpture in many other areas. The integrated LED with an output of 12 watts has a colour temperature of 3,000 Kelvin. The light of the integrated LED is characterised by very good colour rendering with a high colour rendering index of Ra 90. This height-adjustable LED lamp is available in white coated and silver tinned finishes. This handcrafted light sculpture is approx. 50 cm high, has a diameter of approx. 60 cm to 80 cm and has a maximum pendant length of 250 cm. Special sizes and colours are available on request. In addition, the SirSimon is also available in other pendulum lengths (up to a maximum of 700 cm) on request.
