#### Omschrijving

The Domus LARAfelt Pendant Lamp L indigo can be individually set in total height during assembly. Its lamp shade has a diameter of 55 cm and is 13 cm high. The light is emitted by the pendant lamp mainly downwards, upwards it is mostly dimmed. The view into the inside of the lamp is particularly beautiful, where the wool felt is shown to advantage by the low diffuser. The lamp shade of this pendant lamp is covered with indigo coloured wool felt. From the inside, the lamp shade has the colour cinnamon. From the LARAfelt series, there are also pendant lamps with a lamp shade in grey felt (different shade inside colours available) or red felt (shade inside colour wool white).

The LARAfelt Pendant Lamp L is operated with a powerful LED that has a colour temperature of 2,700 Kelvin extra warm white. The integrated LED is characterised by very good colour rendering with a high colour rendering index of Ra > 92. Pendant lamps with a shade diameter of 20 cm or 43 cm are also available from the LARAfelt series.
