Opis

The Foscarini Tress Parete piccola is the smaller one of the two wall lamps out of the famous Tress collection designed by Marc Sadler. It has a height of 40 cm and is 25 cm wide and has an outreach of 13.5 cm. It is offered in white and black.

Colour also transforms its personality: the white version renders it light discrete, the black version makes it strong and decisive. A light source from below illuminates the whole light from within and underlines the graphic effect of the weave projecting designs of shade and signals of light. The internal surface appears much clearer than the external one which creates further contrast. An upper light source emanates light towards the ceiling to light the whole space.
