Opis

The Luceplan Hope Ceiling 109 is the larger of two lights from this series. It has a diameter of 109 cm at a height of 64 cm. The lamp consists of numerous Fresnel lenses, which are attached in pairs on arms. The Fresnel lenses break the light like glass and create fascinating light effects on ceiling, wall and floor. The ceiling light can be dimmed on site.

The lighting series was designed in 2009 by Paolo Rizzatto and Francisco Gomez Paz. The lamps have been created as homage to the famous Hope Diamond as they glow and glitter as well. The lights of this collection have been awarded with several prizes, including the Red Dot Design Award and the Compasso d'Oro.
