Opis

The Anglepoise Type 75 Lamp with Wall Bracket is a wall mounted lamp with tiltable and rotatable shade. Its lamp arms can be readjusted at any time using proven tension spring technology and retains every selected position. This tension spring technology was developed in the 1930s by industrial designer George Carwadin and is still used today in many Anglepoise lights. Both the lamp arms and the lamp shade are made of aluminum, the wall bracket is made of die-cast aluminum with a plated steel back plate. This wall lamp is available in the surfaces jet black, alpine white, slate grey and silver lustre. The on/off switch is integrated on the lamp shade. LED retrofit or compact fluorescent lamps can be used as light sources. A table base in the matching surface is included in the scope of delivery.
