## Opis

The Byok Grado L 2 floor lamp emits light both downwards and upwards. This lamp has a 151 cm long lamp arm and can be attached directly to the furniture or positioned movably with one base. It is available in three versions: DALI dimmable or with an integrated daylight and motion sensor with and without an additional uplight sensor.

The Grado L 2 is particularly suitable for lighting two workstations. In the two versions with daylight and motion sensors, each workstation is assigned to a single sensor, so that two workstations can be illuminated differently. The floor lamp is offered in matt anodised aluminum, matt black and matt white. It is supplied with a colour temperature of 3,000 Kelvin warm white, on request it is also available with a colour temperature of 4,000 Kelvin white.
