#### Opis

The Cini & Nils Convivio pendant lamp decentralized LED has a transparent glass lens through which the light is bundled and emitted directly downwards. This transparent lens provides a distinctive, clear illumination. The lamp is supplied with a decentralized canopy, which allows it to be mounted independently of the power supply. The Convivio is available in chrome and matt black. The integrated LED is on site dimmable with a trailing edge phase dimmer. With an optionally available Casambi module, the light can also be dimmed with the Casambi App via Bluetooth using a smartphone / tablet. A version with integrated Casambi module is also offered on request. The maximum cable length of 385 cm can be individually set during assembly.
