Opis

The Serien Lighting Draft Suspension Tube M pendant lamp can be individually set in its total height when installed. The lamp has a mouth-blown, transparent glass that is offered in the colours clear, brown and blue. Inside the glass is a conical reflector made of opal acrylic glass, which directs the light straight downwards and therefore diffuses it softly and evenly.

The Draft Suspension Tube M has a glass with a height of 26 cm and a diameter of 34 cm. The pendant lamp is operated with an integrated LED that has a colour temperature of 2,700 Kelvin extra warm white. On request, the pendant lamp is also available with 3,000 Kelvin warm white or with dim to warm function. The lamp with dim to warm function imitates the pleasant dimming behaviour of classic incandescent lamps. When dimmed, the colour temperature changes from 1,800 Kelvin extra warm white to 3,000 Kelvin warm white. In addition to this lamp, the Draft Suspension Tube M is also available with a shade diameter of 26 cm and a height of 21 cm.
